Case History Forms

Dear Parents,

Before we see your child for an evaluation, we would like to know some things about him/her. This information helps us to plan what tests need to be given, how to set up our testing session and further information to request from you once you come in.

Please take some time to complete the enclosed Case History Information Form and checklists. Write any additional information on the back of the forms. If you have questions about any items on the form we will talk about them when you come in for your appointment.

It would be very helpful, if you could either mail the forms back to us prior to your evaluation, or drop them by one of our Centers so that your therapist may have them prior to your visit. Please keep in mind that our offices may not keep typical business hours so you may wish to call before making a trip to drop them off. If you cannot get them back to us before your appointment please bring them with you when you come.

Thank you very much!
